DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 3, the phrase "and the like" in the last line of the claim renders the claim indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "and the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Laden et al. (WO 01/85103 A).

Laden et al. disclose anhydrous skin cleansers comprising water-immiscible emollient oil; oil-gelling agent; and emulsifying agent that forms an emulsion in situ on the skin when the skin cleanser is contacted. See abstract. The reference teaches that the skin cleanser gels form emulsions in situ on the skin during use that can be

removed from the skin with water. See instant claim 1. The emollient oils of instant claim 2, the emulsifying agents of instant claim 3, and the oil-gelling agents of instant claim 5 are taught in p. 7, line 11 – p. 9, line 7. Example 1 also discloses a specific formula comprising glyceryl stearate and PEG-100 stearate (emulsifier), mineral oil (emollient), and fumed silica (oily gelling agent). See also Examples 2-10.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Zabotto et al. (US 4673526).

Zabotto et al. disclose anhydrous skin cleansing composition comprising an oil phase and an emulsifying agent. See abstract. Example 5 teaches a formulation comprising HOSTAPHAT KW, the esters of phosphoric acid and ethoxylated fatty acids, petroleum jelly and ozokerite wax, and petroleum jelly oil. See col. 2, line 31 – col. 3, line 62. See instant claims 1-4.
